

Frequent Asked Questions

Where do I find the push notification capability?

Set Up – Look & Feel. It's at the top. Type your text where it says "Enter Notification", then hit the publish button. Remember the recommended text length is 40 characters as some iOS/phone combinations will not display beyond the first line of text. The character count is just below and to the right of where you type the notification.

Where can I find a movie to show the owners?
